Zambion
Time Clocks

Time Clocks are a proven way to reduce cost and timesheet fraud, but just as importantly, they are a great way to improve accuracy and streamline the payroll process.

Zambion timeclocks incorporate advanced technology such as fingerprint recognition algorithm, optical sensors, embedded design technology and advanced software capabilities. With its 3.S"HD LCD colour screen, high speed verification and large memory capacity, it is one of the leading models in the market.
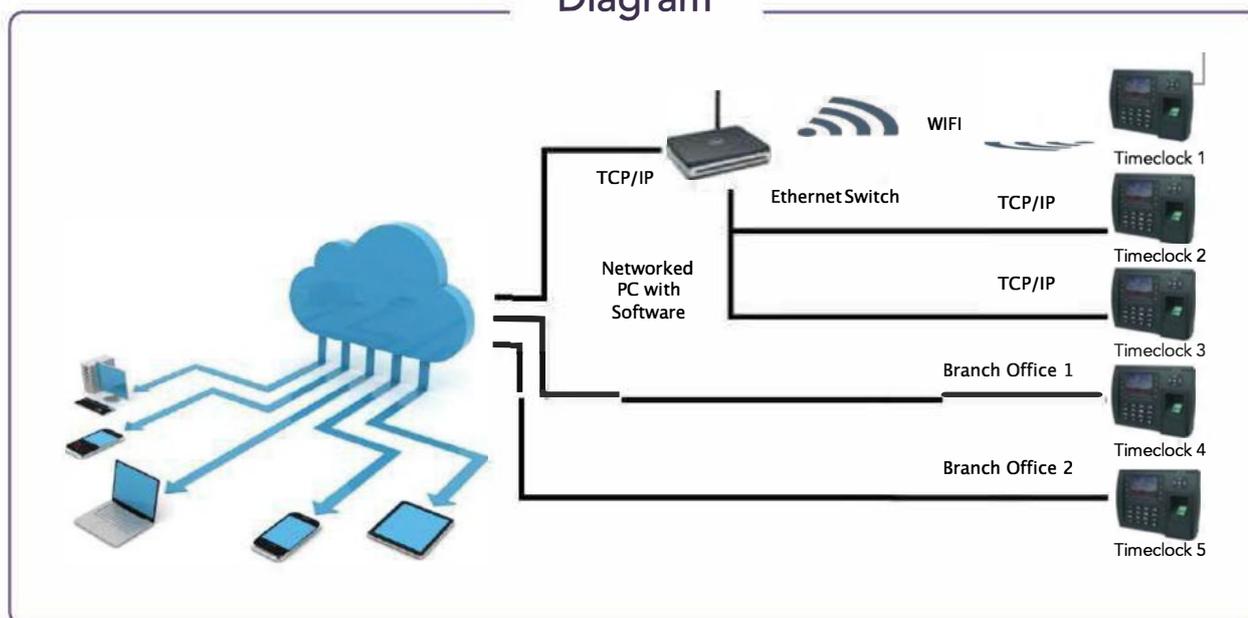

Features at a glance

- Biometric scanning, swipe card, and password capable
- Single point staff registration with smart replication
- No firewall port/ configuration required
- Supports WIFI and DHCP
- Composite Algorithm System with High Speed Operating System
- Embedded LINUX System
- Standalone or Network Environment
- Embedded Multi-Language Interface
- 3.5" Real Colour LCD with High-Definition Graphical User Interface
- Large Memory Capacity with High Speed Verification
- 24 Hours Continuous Operation Available
- Saves Data During Power I Internet Outages

Specifications

Technical Specifications Capacity		Verification / Identification	
Fingerprint Capacity	10,000	Verification Speed	(1:1): ≤ 0.5s
Log Capacity	200,000	Identification Speed	(1:N): ≤1s
Language		FBR	≤ 0.01%
Multi Language	40+ languages available	FAR	≤ 0.0001%
Power Supply		**Communication**	
Power	110 / 220 VAC ~ 12VDC	TCP / IP HTTP GET / POST Protocol	
Environment		**Machine Size**	
Operation Temperature	0°C ~ 45°C	205 (L) * 145 (W) * 53 (H) mm	
Operation Humidity	20% ~ 80%		
Display / Speaker			
LCD Display	3.5" TFT high definition graphical interface, 65,000 real colour		
Speaker	Voice Prompt (language can be selected)		
Additional Functions			
9-PIN ID, Printer Output, External Bell Connection, Multi-Verify ID Reader, Mifare Reader, WIFI, GPRS

Who Owns Your Data?

Over the past 10 years we have seen customers being held to ransom by demands that if they want to view their historic payroll records then they must pay big for the privilege, or if they want a physical backup, then they need to pay an additional large sum - five digits is not uncommon!

We recognise that the data in Zambion is yours and that if for any reason you wish to change providers then we will send you a backup, as well as Excel reports, at no charge. In fact, if you would like to receive a weekly or daily backup of your data then let us know - we will be glad to make this happen.

Why should you be content with Generic Products & Services?

These days customer service as a strategic differentiator is talked about a lot, however putting it into practice is difficult. At Zambion we have always believed that great customer service will set us apart from our competitors and that the key ingredient is to individually tailor our service to your needs. This is why we do not charge for new reports and do not charge for product modifications. In fact, we go one step further and have aligned our support agent's remuneration package with delivering a great customer experience. For example, after every closed help desk ticket we send out a short customer survey and if the Zambion support agent does not score higher than a 4 star rating, then their bonus component may be adjusted accordingly. We also have a few other KPIs like this and it is in the interest of our staff to deliver a great product and a great customer experience.

And finally, we would like to thank you for taking the time from your busy schedule to read our information pack. If you have any feedback, questions, or would like to see any changes made, we would be glad to hear from you.
